

Alternative Fueling Station Counts by State

This table shows alternative fueling station counts by state and fuel type. For an annual snapshot of the data, download the [historical station counts](#) [_./files/docs/historical-station-counts.xlsx](#)).

☐ Public ☐ Private ☒ Total

Station Counts by State and Fuel Type								
State	Biodiesel	CNG	E85	Electric ^a (station locations EVSE ports Level 1 Level 2 DC Fast)	Hydrogen ^b (retail non-retail total)	LNG	Propane ^c (primary secondary total)	Total ^d

^a Includes legacy chargers (</glossary.html#LegacyChargers>) but does not include residential electric vehicle charging infrastructure.

^b Primary propane stations offer vehicle-specific fueling capabilities. Secondary propane stations have fuel available for use in vehicles but limited vehicle fueling services.

^c Retail hydrogen stations accept payment at the point of sale. Non-retail hydrogen stations are only available to a certain subset of customers (e.g., require an access card, PIN, or training).

^d Totals are the number of station locations for all fuel types combined. Individual stations count multiple times if the station offers more than one fuel type. For electric, the total includes EVSE ports rather than station locations. For hydrogen, the total includes all (retail and non-retail) stations. For propane, the total includes all (primary and secondary) stations.

[ABOUT THE DATA \(/STATIONS/#/FIND/NEAREST?SHOW_ABOUT=TRUE\)](#)

Data last updated: 7/30/2022

Legend

- Biodiesel – B20 and above
- CNG – compressed natural gas
- E85 – ethanol flex fuel
- Electric – electric vehicle supply equipment (EVSE) ports
- LNG – liquefied natural gas
- Propane – liquefied petroleum gas (LPG)
